You should see the folder icon in the top left of the screen. Right click the folder and click on add to sidebar. After adding the folder in the sidebar it looks like this. Now go back to your ARX folder. Then click on 3D at the top. This will open up the Autodesk ARX App. There you will find the keygen. Copy it and paste in your ARX folder. Save it. Now on your X marks tab find ARX-Edit. Double click it and select your newly made keygen. You should have the option to save the key as a script. Just select the option and close it. Your key will now be saved in the ARX-Edit folder. Please note that this is not the final version of ARX, it is a buggy version which has not yet been fully tested. You are using this at your own risk. EDIT - 09/15/2019 You are able to use Autodesk-ARX on multiple PCs but you should use your own autocad license key with it. If you don't have one it will still work but it will look like this. You will not be able to save your changes. The keygen was included in the previous version of Autodesk-ARX but was not working at the time. Since that time we have made some changes in Autodesk-ARX. In this version we have made some changes to the script in order to improve the stability of it. But in the process it deleted the keygen from the Autodesk-ARX folder. Now we have added a new way to use the keygen. Thank you for using this program. A new environmental measure is spreading through the city, and the buzz around it is positive.
