AutoCAD 2017 for Windows
Before, autocad was used in architecture mostly but now it's used in many other industries like, Mechanical, civil engineering, automotive, construction, architecture, more. There are different categories of AutoCAD. In this article, we are going to discuss about AutoCAD 2016 and features. AutoCAD is a computer-aided

design (CAD) software application, offering 2D drafting tools, 2D and 3D modeling, documentation, and plotting. Released in 2016, AutoCAD (formerly known as AutoCAD R14) is used worldwide by architects, engineers, contractors, drafters, students and other professionals to draw 2D and 3D designs on computer screens. Here we are going to discuss about different category of autocad and its

features. AutoCAD History
AutoCAD is not a new product, it was introduced in 1986. It is the most popular CAD software in the world. The earliest version of AutoCAD was released in 1986 by Autodesk. AutoCAD Revolutionaries was the first product by Autodesk to achieve widespread acceptance and use in the manufacturing industry. In 1986, users could only select from three predefined templates. Today,

with the introduction of the latest AutoCAD 2017, the list has been increased to 14. You can see the infographic of AutoCAD history below:

WindowsIkeh – EDK1 9mm

Product Information

Description Ikeh designed the
EDK1 with the pro shooting in

mind. It is a short barreled single stack model that is considered a compact pistol. It has a 4.8 inch barrel, weighs just under 23 ounces and is 7 inches long. The EDK1 is equipped with a traditional hammer and features a flared mag well which makes the magazine easy to remove and insert. It also has a slide stop, a single action trigger and a polished bull nose grip. The overall design is such that a safe profile is achieved and

allows for an easy target acquisition and a fast shot delivery. The frame material is stainless steel which makes it great for field stripping or cleaning. The barrel also features a straight barrel bore. The overall look of the EDK1 is an all steel, solid frame model that features a nickel finish. Ikeh is a U.S. based company and manufactures many of the top-quality firearms currently on the market. The company was

founded in the late 1930s by Aaron R. Luria as the Aaron R. Luria Import Company. In the years that followed, the company started making their own pistols. The company received a license from Smith & Wesson and started manufacturing their own line of pistols. The first models were sold in the early 1940s as the “Pride of the USA.” These pistols were easily identified by their two part box stocks,

triangular safety and sliding serrations on the grip and ejection port of the slide. The company received a license for the name “Ikeh” from a distributor of a type of olive oil in Japan. The company then became a producer of Japanese-made pistols, rifles and shotguns. The company currently uses a full service manufacturing facility in Fort Worth, TX. Ikeh’s technology continues to evolve and

improve. Today, they produce
an array of firearms that are
among the best on the market.
